

Hinckley-Big Rock CUSD #429 Wonder Day

HBR is committed to empowering our students as learners. One such way that we believe our students will be empowered is through personalized learning. Personalized learning maximizes the learning and motivation of students through the utilization of student choice, collaborative design, connections of learning to student pursuits, and student autonomy. This is directly implemented using clearly created goals and outcomes, student self-reflection, and valuable teacher feedback utilizing flexible learning environments and pacing.

All HBR schools will plan for and implement a Wonder Day during the 2018-2019 school year. This is our first attempt at empowering our students through a school wide activity that utilizes student choice, collaborative design, autonomy, and connections of learning to our students' pursuits. Each building has worked to plan for this day to provide a meaningful learning experience for our students. The dates for each building's Wonder Day are below.

HBRES
